NOTICE

1. Notice

1. Before first using the bathtub, pls read the installation illustration carefully and keep it well.
2. Open cool water and hot water together when showering and the suitable temperture is from 40-50 degree. To extend the life of the bathtub, make sure do not use it up 80 degree.
3. Clean the bathtub periodicly or aperiodicly.
4. Take care of children, olds and disables when showering.
5. Do not use knife or any hard tools knock or damage the bathtub. Also no dog-end or any hot-case more than 100 degree to touch it.
6. After using, close the water and unwater it.

INSTALLATION ILLUSTRATION

2. Installation Illustration

1. Open the box and clean the bubble film firstly and take the plastic pipe out. Then put the bathtub in the suitable place and adjust the bottom feet screw to make the bathtub in a flat level. (Make sure all feet should be stay on the floor stably.)

2. Contact the plastic pipe with bottom drainer to make the water to outfall on bathroom floor.

Notice:

Before completely finished, the bathtubs' pipes should be installed in some place according to design. And on the way, it may make the pipes to different place, so before installing bathtubs, you have to check the drainer and pipe firstly.

USING ILLUSTRATION

3. Using Illustration

1. The using way of drainer:

Step on the drainer directly, then the cover will jump automatically, then the water can go down smoothly. (See pig 1)

pic 1 way of drainer

2. The dismantling way of drainer cover:

When the drainer is choked by something else, turn it to a counterclockwise direction, then take the drainer cover and clean it. (See pig 2)
